

THE POCHE DAILY RECORD

FRIDAY, DECEMBER 20, 1872

A. D. JONES, EDITOR

AGENCIES.

San Francisco—MYRON ANGEL, 432 Montgomery St.—Room No. 11, Sole Agent for Recon- struction District, Utah—J. A. SCHMIDT & CO. Hamilton—T. STARR, Russell's Bookstore. W. A. GEDLING, News Dealer in Goodrich's saloon, is our Agent in Bullionville, and is authorized to receive subscriptions for the Record and receipt for the same, Virginia City—JAS. McDONALD, Eureka—F. LOEWY & CO.

MINING REVIEW.

We desire to say to Mining Superintendents that no one is authorized to gather points in regard to the matter, unless by written authority from either the proprietors or the editor of the Record. W. H. Thatcher is not authorized to collect any mining review, nor has he any connection with the paper.

HOLLAND & TAYLOR.

THE CORNERS.

While our friends of the Bay are studiously engaged in making pools and corners, and each with Gilpin speed seeks to become a millionaire, we of the sagebrush camp are looking to permanent prosperity and a home that shall yet be ours. The success of the Bullionville and Pioche Railroad, the inauguration of a railroad incorporation to Palisade and the proposed extension of the Nevada Central south to the coal, salt and iron mines of Southern Utah, all tell us that we have a point that must ere long be one that shall be of value as a commercial mineral center, as it is now one of monetary value. The great deposits of coal that are known to exist in Utah and within several miles of this place, should stimulate us in the endeavor to send the iron horse at the earliest day to give us that fuel.

With such aid the road will soon be completed, and fuel for the extensive mining enterprises now inaugurated and those already contemplated, will be afforded in such abundance that none need to fear for want of power. With the advantages of cheap fuel we are safe in the declaration that the iron for this coast will be found in abundance. Who puts the ball in motion? We have now silver bars, let us add to that the iron railroad and then we shall have permanent prosperity.

HABEAS CORPUS.—Sheriff Rogers, of Utah county, says the Salt Lake Herald of the 15th, brought into the city last evening, a prisoner, held by him, named L. W. Brown, to answer to a writ of habeas corpus, issued by Associate Justice Hawley. Brown, who is a citizen of Lelid, was indicted by the grand jury of the Probate Court of Utah county, for seduction, at the September term of said Court, but the trial was postponed to the present term. The trial was going on, and Brown was at large on bail, when, doubtless to procure a habeas corpus, his bondsmen gave him up, and as a matter of course he was placed in confinement by the Sheriff. This accomplished, his attorney comes to Salt Lake and petitions for the habeas corpus, which is granted by our friend Judge Hawley. The hearing of the case is set for to-morrow, at the office of Robertson & Spratt. In the meantime the prisoner is admitted to bail. We shall see what we shall see.

THE WEATHER BUREAU.—The predictions of the Weather Bureau, of which sixty-nine per cent. were verified last year, says the New York Commercial Advertiser, have in seventy-seven cases in a hundred this year, proved correct, and mariners and farmers, and other classes of men whose business is affected by the weather, have governed their movements largely by them. A single illustration will show the practical value to commerce of these reports. The observer at Buffalo gave it to the Board of Trade in his opinion, in the afternoon before the several gales on the lake, early in October, that it would be unsafe for vessels to go out on Lake Erie that night. Early in the evening orders came from Washington to display danger signals. Twenty-three vessels and barges, ready to sail, staid in port, and escaped the disaster which would surely have overtaken some of them.

A struck jury is where the panel is ordered to include forty-eight citizens of high standing and acknowledged integrity. From these twelve men can be selected, after the counsel on each side have made alternate objections, until the panel is reduced to that number. This is a "struck" jury.

The Denver News, of the 9th, announces the arrival of Captain John Moss from San Francisco, en route for the diamond fields. Moss was confident that he had a good thing, and believed the expose of the diamond fraud would not detract from legitimate business in diamond mining.

FIRE IN SALT LAKE.—On the morning of the 15th, as we learn from the Tribune, a fire broke out in the house of Thomas Horne, in the 20th Ward. The house and its contents, valued at \$4,150, were destroyed. A subscription was started for the relief of the sufferers.

The official returns of North Carolina show Grant's majority to be 39,994.

PAUPERISM.—An examination of statistics of pauperism of England and the United States respectively presents a strong contrast. The pauperism of England and Wales represented a portion of 42.6 per 1,000, while the pauperism of the United States amounted to but 1.9 per 1,000. The State of New York leads the Union in the volume of its pauperism, but even New York supports through its system of poor relief but 6 in 1,000 of its population, while the City of London maintains about forty paupers in every thousand inhabitants. The pauperism of New York would be less than 3 per 1,000 were the foreign-born poor left out of the calculation. Depressing as these English figures must be to every reflecting statesman or social economist, some slight satisfaction has been extracted from the fact that since 1870 the number of paupers has been steadily on the decrease. At the end of August last, the number of people maintained in poor-houses or in receipt of out-door relief, had fallen to 809,444, being a decrease as compared with 1870 of 116,324, or fourteen and one-half per cent. Even under this greatly reduced volume of pauperism, England and Wales still maintain on public charity, thirty-five per one thousand of population, or about seven times as much as is done by the State of Massachusetts.

SPECIE PAYMENTS.—The San Francisco Chronicle cannot understand why the Government does not resume specie payments, and continues: "Our Government is certainly solvent, has illimitable resources, millions of gold in her Treasury vaults, and her bonds are at par, although bearing five and six per cent. interest. It seems to us that a simple declaration of the fact that gold would be paid for greenbacks, would send currency to par, and no one would want gold. It is not quite apparent to us why there should be any national gold banks to reap the profit of the hundreds of millions of circulation, nor why Treasury notes would not answer all the purposes of private bank notes for the business of the country. The bill of Senator Cole, authorizing the receipt of twenty per cent. of import duties in national notes, and an increased twenty per cent. annually till our customs dues are payable in currency, is a movement in the right direction, and is the beginning of the end."

A Monterey (Cal.) dispatch to the San Francisco Chronicle mentions the death at Monterey on the 13th, of an Indian woman 116 years old, according to the records of the Catholic Church. She was buried at the Carmel Mission, inside of the old ruins of the church that she helped to build over one hundred years ago, under the auspices of Padre Junipero Serra. She was always in good health and retained all her senses up to the day of her death. A great many of the most prominent citizens of this place, with the Catholic priest attended her funeral.

The Peruvian Government has under consideration a proposition to throw open to any one, native or foreigner, the right to work the mines they may discover within its territory, with a greater extent of land than what was allowed by the old Spanish mining laws. The working of coal is to be particularly favored by certain additional privileges, while the State will buy the coal of such mines in preference, at the current market prices.

SENATOR NYE is on the Committees on Naval Affairs and Territories; Senator Stewart is one of the Committees on Public Lands, Pacific Railroad, Revision of the Laws of the United States, Investigation and Retrenchment. Mr. Kendall is on the Committees on Mines and Mining, and Expenditures in the Treasury Department.

The contest for U. S. Senator from Missouri waxes hot. Frank P. Blair, (the present incumbent,) Waldo P. Johnson, Gen. Jas. O. Broadhead, and Sam'l T. Glover, are prominent candidates. Blair seems to have the inside track.

The fifteen States washed by the Ohio, Mississippi and Missouri, have an aggregate population of 16,841,496, 129 Representatives in Congress, and a wealth footing up \$10,819,170,914.

Both Houses of the Virginia General Assembly adjourned, out of respect for the memory of Horace Greeley.

The question of a new Constitution for Missouri is agitated.

A STORM EXPECTED.—The San Francisco Alta of December 15th, gives this intelligence:

It is reported that the Signal Service Department at Washington have ascertained that a storm will visit this coast within two days, and that orders have been sent to the Government vessels to postpone their departure from this port until the storm passes over. Inquiries at the signal observer's station failed to elicit any information, but the news comes semi-officially that the Alexandria, with United States troops for Sitka, has been ordered to remain in the harbor, on account of the impending storm. The barometer has been steadily falling, and there is a report of rain in Oregon. As the expected storm is to come from the north, the report is so far corroborated. We give the report for what it is worth for the information and guidance of masters of coasters. If the report is corroborated, they have escaped probable disaster; and if it prove unfounded, they have only suffered a delay of a few hours.

Telegraphic Dispatches.

SPECIAL TO THE POCHE DAILY RECORD

PACIFIC COAST.
Sacramento, Dec. 19.—Dr. G. G. Tyrrell was thrown from a buggy to-day, and suffered very severe injuries.

The jury in the case of Mary Thomas, charged with arson in the first degree, returned a verdict of not guilty. The theory of the defense was, that she was insane when she committed the act.

Sonora, Cal., Dec. 19.—George T. Wright, Supt. of the Excelsior mine at Sugar Pine, was found dead to-day in his bed, at the mine. He probably died in an epileptic fit.

Salt Lake City, Dec. 19.—A fire occurred last night, and was a narrow escape from a disastrous conflagration. It was the work of incendiaries. A large number of desperate characters are here, who threaten to burn the city. An arrest on this charge was made to-day, on affidavit before Chief Justice McKeon.

It is reported that the Government will interpose the authority of law against the assumed general jurisdiction of the Probate Courts.

Three hundred and sixty-five tons of silver bullion, run by the Saturn Works, were transported on the Utah Southern Railroad in the past twenty days.

Gov. Woods declines to call an extra session of the Legislature to revise the laws.

EASTERN.

Washington, Dec. 18.—The Secretary of the Treasury gave notice to-day that he would commence the payment of interest due January 1st, 1873, on Saturday, the 21st, without rebate.

The President visited the Capitol this afternoon, and held a conversation with several Senators on business matters. It referred to the Vienna Exhibition, as it is known that he expressed a desire to have American productions largely represented, but fears that the appropriation of only \$100,000, as proposed by the Committee on Foreign Affairs, is insufficient for the purpose. He also spoke of the importance of an early appropriation to enable the Commission to resume the investigation of outrages on the Texas border, though he made no special recommendation in the message transmitted to Congress.

In the report of the Commissioner, he has personally interested himself on the subject of obtaining additional information of the public meeting to be held at Cheyenne, Wyoming Territory, to-night, in opposition to the proposal to divide that Territory among the adjoining Territories. The reports from Laramie City and other points, represent public sentiment as pretty equally divided.

Chicago, Ill., Dec. 18.—A Washington special says the Postmaster General has made a very important decision in relation to the responsibility of Postmasters, under their bonds, for the loss of registered letters, and has decided that Postmasters are responsible, and will be held accountable. This construction has never been made before, and is contrary to the opinion of many eminent jurists. It increases the responsibilities under postmasters' bonds.

The House Committee on Postoffices this morning overruled the ruling of the Postmaster General relative to the collection of double postage on unprepaid matter.

Providence, Dec. 18.—The Rhode Island Medical Society has admitted the first woman (Anita E. Tyng) to membership.

New York, Dec. 18.—Contestants of Greeley's will announce the determination to push things to the end.

Boston, Dec. 18.—The Legislature is prorogued till January.

Portland, Dec. 18.—William Wirt, of Virginia, has been appointed to fill the vacancy in the Maine Supreme Court.

New York, Dec. 19.—The Goat Island scheme will soon be referred to the P. R. R. Committee, on Stewart's motion. The lobby is beginning an active campaign, and there are probabilities of its passing the Senate immediately after the holidays. The California members of the House persistently urge that the adverse excitement has subsided, intimating that the California hostility is practically over. In proof, they cite the present inactivity of the opposition in San Francisco. The monopoly surely wins, unless the people awake immediately.

Yesterday Cyrus W. Field bought out the interest of a considerable number of holders of stock in the New York, New Foundland and London Telegraph Co., amounting in all to about \$3,000,000. The price is 90 cents.

Lafayette, Ind., Dec. 19.—About five o'clock this morning a switch engine, standing on the track on the corner of Union and 8th streets, exploded with terrific violence. David McNary, engineer, was found dead fifty feet from the place. A youth named Kilgore and another person on the engine at the same time, were blown some distance and badly injured, but will recover. Houses opposite the scene of the accident were badly shattered, and flying pieces of the engine crashed through the doors and windows. The cause of the explosion is unknown.

Washington, Dec. 19.—The report that Colfax has accepted the editorship of the Tribune is erroneous. He has to-day replied to many inquiries that the negotiations on the subject have not resulted

in any agreement; that yesterday, by mutual consent, they were regarded as terminated.

In the House, Hooper, from the Investigating Committee, reported on the charges against the Tenth National Bank of New York, of locking up the currency for the purpose of producing a money panic. The Committee recommend the passage of a bill to prevent National Banks from locking up currency.

A committee of five from the New Orleans Delegation had four hours' consultation with the Attorney General to-day. The Committee meet the President at 3 o'clock.

FOREIGN.

Paris, Dec. 18.—Chamsey's corps is being increased to 100,000, while Ducrot, doubtful republican, has only 48,000 men.

Thiers, to-day, said he intended to keep the monarchists in awe.

MORE ABOUT DIAMONDS.—The Salt Lake Tribune publishes the following dispatch from Louisville, Ky., dated the 13th: Phil Arnold, whose property was recently attached at the instance of Wm. M. Lent on account of the recent California Diamond Swindle, has published a long defense in the Courier Journal denying the charge, and saying that he never sold a dollar's worth of property to Lent, or had a contract with, or received money from Lent at any time, and denies that the fields were salted by him, but alleges that the discovery was honestly made, and the transactions in regard to it were all between himself, Slack, Harpending and G. B. Roberts as stated. Privately Arnold says he has discovered silver mines in Kentucky worth three hundred millions, and has bought for nine millions all the property in the locality of the mines. William Wilson, a prominent lawyer of Hardin county, where Arnold resides, passed through the city yesterday, en route to California, to bring a libel suit in behalf of Arnold against the parties connected with the charges of swindling made against him. Wilson says he has been prospecting with Arnold and knows he has made a discovery of a silver mine and the purchase of the property.

A queer matrimonial muddle has just been settled in Herkimer county, New York. A certain ex-sheriff of that county, who passed much of his time Philadelphia, received information that his wife was unfaithful to him, and wrote her a sharp letter about it; her reply was equally sharp, and stung him into bringing suit against her paramour for destroying the peace of his family. Before the suit was concluded, the paramour took the woman to Indiana, and procured a divorce for her, took her to Massachusetts and married her, then took her home, and commenced a suit against the sheriff for defamation of his wife's character. Last week the suits were both decided. The sheriff received a verdict of \$2,000 for his wife; the other man a verdict of \$49 for his wife's infidelity. Both parties cry "quits," and are glad the thing is over.

MARRIAGE OF MR. KENDALL.—Under the head of "Married" we find the following in the Eureka Sentinel of the 18th: In Fall River, Mass., on Thanksgiving Day, by Rev. S. Wright Butler, Hon. Charles W. Kendall, M. C. of Hamilton, Nevada, to Miss Laura E., only daughter of Niels Arsen, Esq., of Fall River.

New Advertisements.

NEW BOOT and SHOE STORE.
